Notes

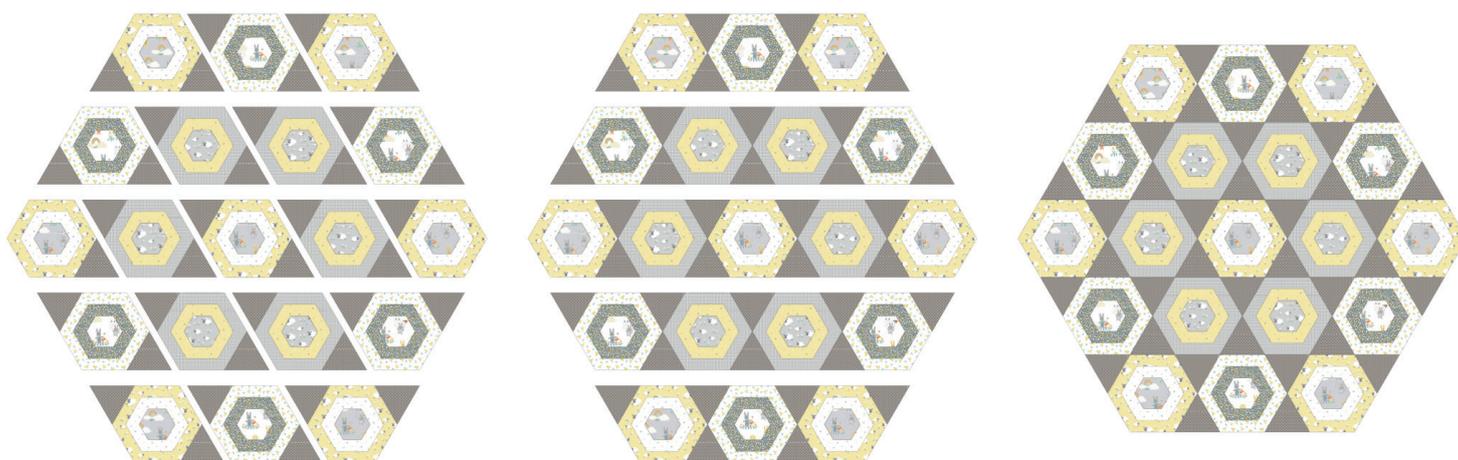

- Read the pattern in full before starting.
- ¼" seams are used throughout except where stated otherwise.
- Press after each seam, pressing seams open or to one side as preferred.
- WOF - width of fabric – a strip of fabric cut from selvedge to selvedge or from selvedge to centre cut in the case of a FQ.
- Make sure to visit <http://www.makoweruk.com/projects/> to ensure you are working from the most up-to-date version of the pattern.

Making the quilt

1. Cut the fabrics as shown in the fabric requirements table.
2. Following the fabric layout in the main quilt image, sew six B template pieces to each A template piece using partial seams as set out at steps 3-6 below.
3. Sew a partial seam joining one of the B template pieces to one of the A template pieces (see fig 1 opposite where the red dashed line indicates the seam to be sewn). Press seams towards the B template piece and trim off corners.
4. Attach the second B template piece using a full seam as indicated in fig 2 and press seams.
5. Continue adding B template pieces using full seams as indicated in figs 3 to 6, pressing after each seam.

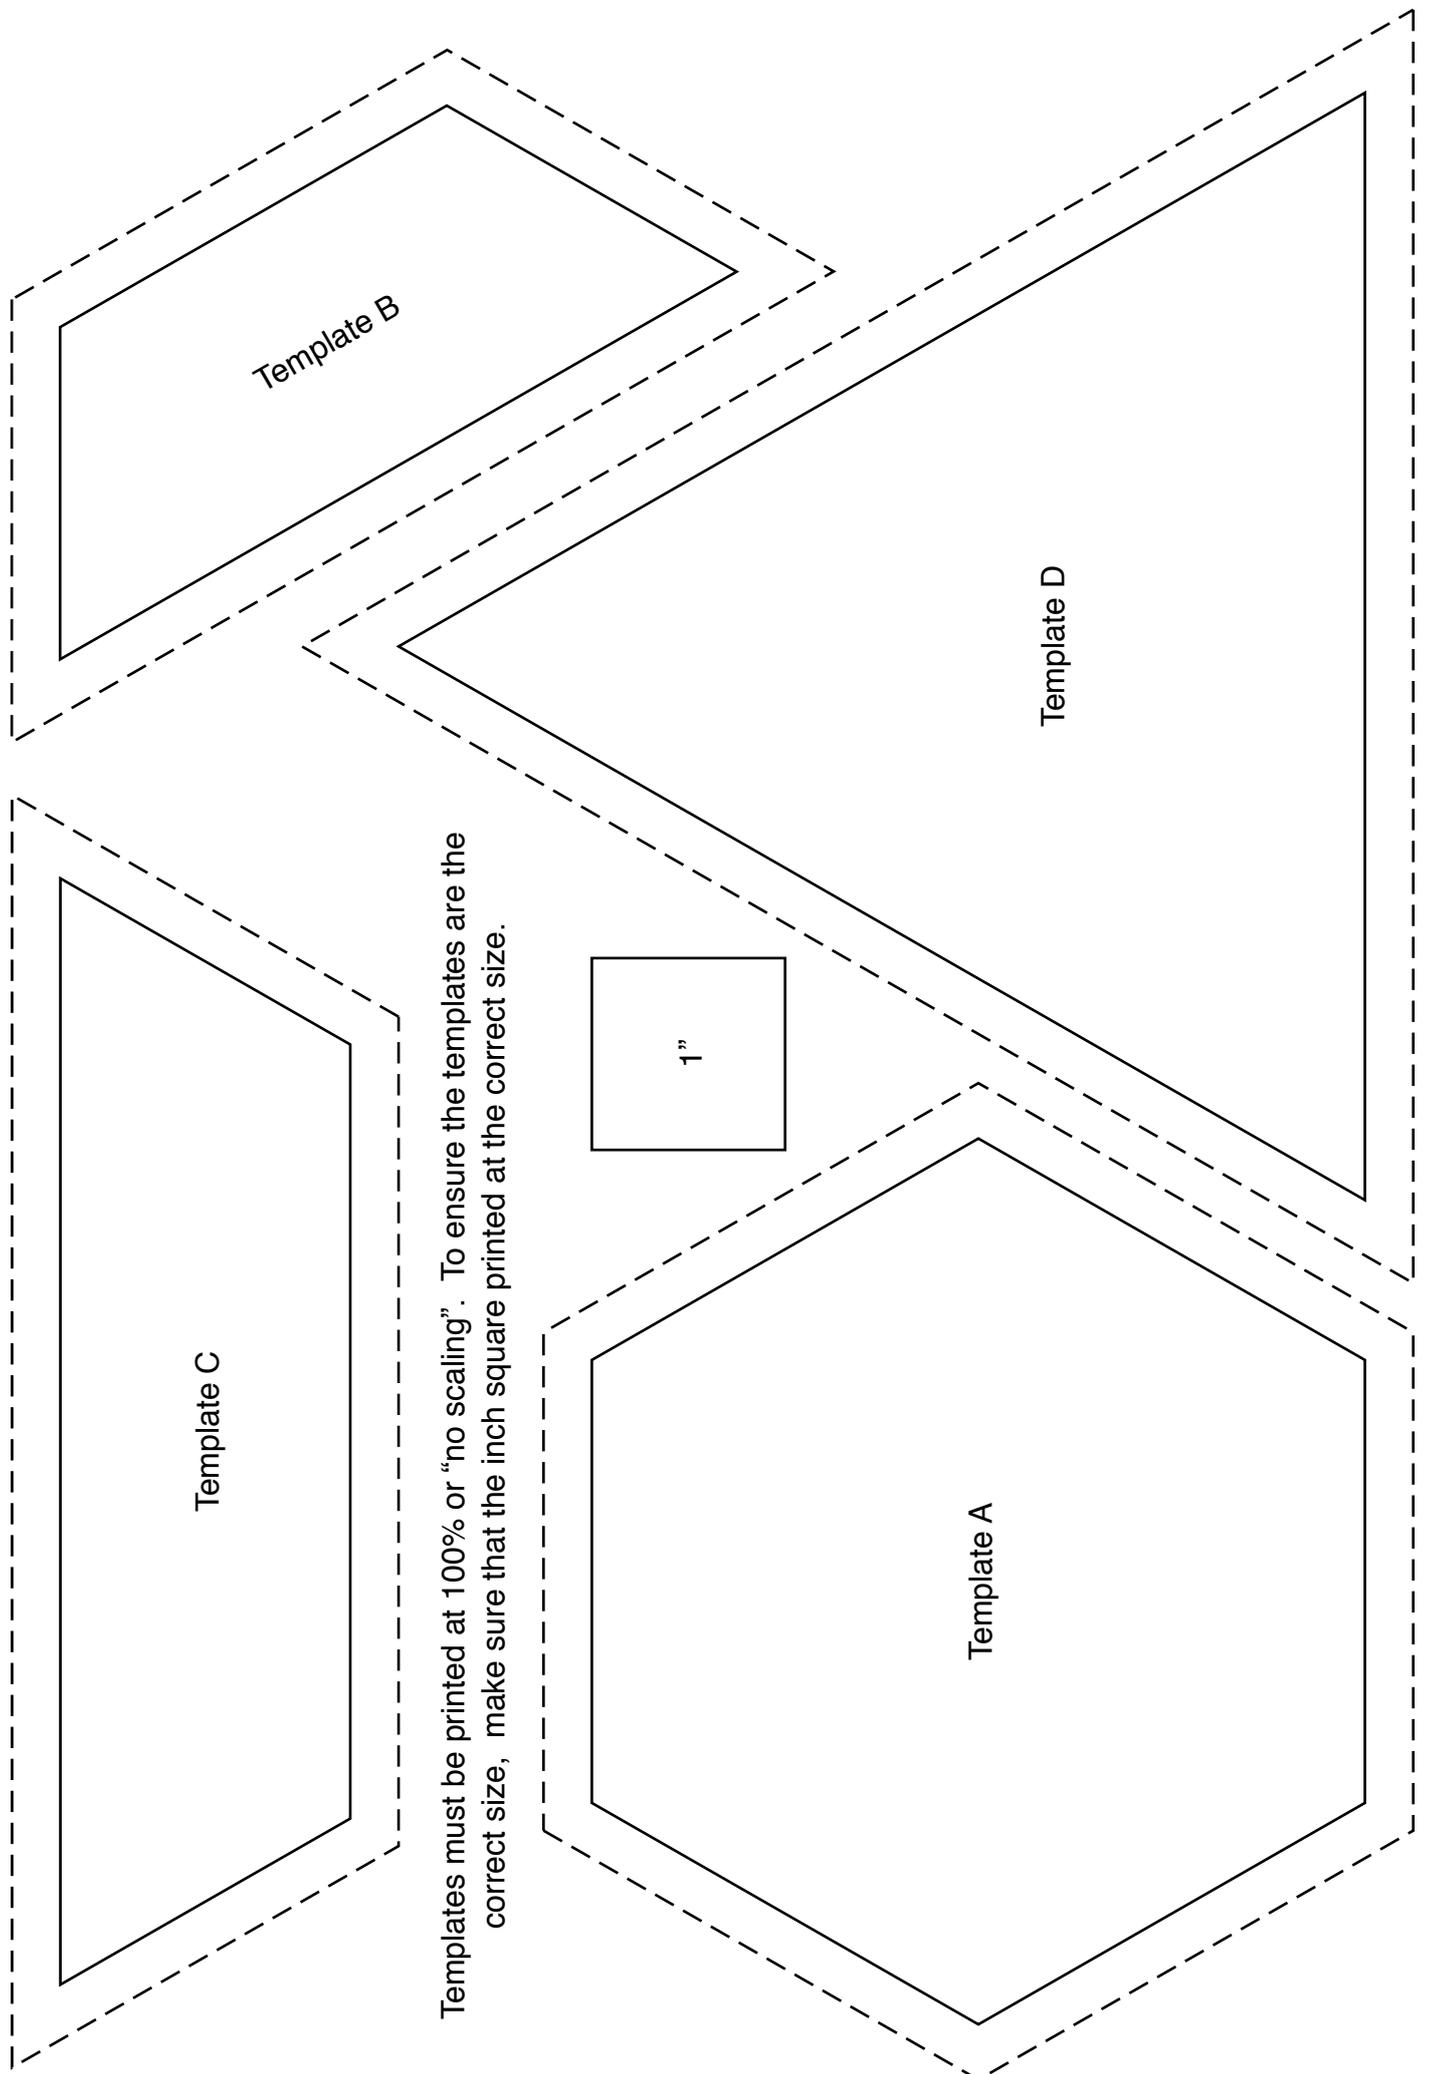

6. Sew the rest of the seam sewn at step 3 as shown in fig 7.
7. Repeat the process adding the C template pieces to the hexagons made above.
8. Sew the hexagons and D template triangles together as shown in fig 8.
9. Sew those pieces into the five rows as shown in fig 9.
10. Sew the five rows together as shown in fig 10.

Finishing the quilt

1. Sew the binding strips end to end using diagonal or straight seams as preferred and press wrong sides together along the length to make a double fold binding.
2. Make a quilt sandwich, basting together the back, the wadding and the top.
3. Quilt as desired then trim hexagonal, removing excess wadding and backing. We quilted straight lines 1 1/2" apart (one set horizontal, two sets diagonal, following the lines of the hexagon edges) using a cream Aurifil 40wt thread on the front and back.
4. Bind the quilt taking care to mitre the corners.

Templates must be printed at 100% or "no scaling". To ensure the templates are the correct size, make sure that the inch square printed at the correct size.
